

PATIENT	Baby	SPECIES	Feline	AGE	18 years	OWNER	Ms Deborah Rodriguez
SEX	Spayed Female	BREED	Domestic Long Hair		ADDR	10649 Kinnard Ave., #4	
COLOR	Tuxedo	MARK			Los Angeles, CA 90024		
ID	86159	TATOO		RADIO	PHONE	(310) 903-8341 (1st)	
RABIES		OTHER			(248) 766-0075		

Entry date: 8/22/2019 Entered by: ST Completion date: 8/23/2019
 Result ID: 419847 Status: Reviewed
 Profile: Fructosamine
 Laboratory: Antech - Zoasis West

Test	Value	Range
Fructosamine Assay		
FRUCTOSAMINE	367 umol/L	143 - 373
<p>-----INTERPRETIVE COMMENT-----</p> <p>Normal fructosamine concentrations can be seen in patients with transient (stress-induced) hyperglycemia or very recent onset of diabetes. Normalization of fructosamine concentrations may indicate diabetic remission. Fructosamine concentrations <300 umol/L in diabetic cats may indicate prolonged hypoglycemia caused by insulin overdose.</p> <p>Differences between successive fructosamine measurements have to exceed 50 umol/L to reflect a clinically significant difference in glycemic control.</p> <p><405 umol/L = Good regulation 405-497 umol/L = Fair regulation >497 umol/L = Poor regulation</p> <p>Note: Due to a Fructosamine reagent change, we have updated our reference range and interpretation guidelines</p>
